💼 Website Pricing & Monthly Plans

We believe in providing transparent pricing that reflects the complexity and quality of the work we deliver. Building and maintaining a professional website involves more than just design. It includes security, server management, updates, and user experience optimization. Below is our updated monthly pricing structure:

💡 Basic Website – R700/month

Perfect for simple, static websites such as digital portfolios, landing pages, or basic informational sites.

Includes:

- Ongoing website maintenance
- Unlimited content updates
- Security monitoring and patching

This package ensures your website is always up-to-date, secure, and performing at its best at an affordable monthly cost.

📰 Blog Website – R1800/month

Ideal for content creators, writers, and media outlets who need a publishing platform with regular updates.

Includes:

- Full maintenance and support
- Security management
- Blog post publishing support and formatting
- Regular updates and changes

Blogs require constant attention. Whether it's posting new content or ensuring uptime during peak traffic.

🔐 User Sign-Up Websites – R5000/month

Designed for platforms that require user authentication or account creation (e.g., dashboards, membership sites, portals).

Includes:

- Backend server configuration and management

- Secure user authentication systems
- Database management
- Ongoing updates and improvements
- Full maintenance and security

These types of websites involve complex infrastructure and user data handling, which require robust backend systems and consistent monitoring.

🛒 E-Commerce (Without Account Signup) – R2500/month

For businesses selling products online without user registration. Fast, secure, and user-friendly.

Includes:

- Secure payment gateway integration
- Product and pricing updates
- Backend infrastructure
- Maintenance and support
- Website and transaction security

We handle the technical complexities of e-commerce so you can focus on your business.

🛍️ E-Commerce Advanced (With User Accounts) – R6000/month

Tailored for full-featured online stores where customers create accounts, track orders, and receive personalized experiences.

Includes:

- Secure payment gateway integration
- User account management system
- Product catalog and price updates
- Database configuration and management
- Ongoing maintenance and support
- High-level website and payment security

This package is built to scale and meet the high demands of modern online shopping platforms, ensuring performance, security, and stability at all times.

📌 Note:

Images provided by us will be at an additional cost of R200.

All prices are monthly and include continued support, updates, and the assurance that your website is always running securely and efficiently. Complex features require more resources. Our pricing reflects the depth of backend systems, user data security, and overall performance maintenance.

If you're unsure which package suits your business, feel free to reach out.
